A Reminder.

### The Genius Who

very highest tribute that can be paid to a member of their profession is to say that "He writes his own stuff," for it is a fact that a great many of the funniest and most original of our "sidewalk conversationalists," monologue artists and other entertainers who rely rather on what they say than on what they do, are utterly un able to devise a single joke that is worth repeating. This is because the mimetic talent is not altogether an intellectual one. Not long ago a number of comedians were seated in a Broadway cafe engaged in earnest conversation. Each one had spoken modestly of his success in some role, and each one had smiled approvingly on and listened deferentially to all the others in exchange for similar courtesies extended to himself. After one round of these agree able artistic reminiscences the conversation leaped at one tremendous bound to Boh Ingersoll, and two or three of the mum mers who had heard him were loud in praises of his fine magnetic qualities and great intellectual endowments. There was even one member of the party who had actually read one of Colonel Ingersoll's books, or claimed to have, and he had a good deal to say about the many "strong lines" that occurred in his writing. There was no dissenting voice in the chorus that sang his praises, but it remained for Mr David Warfield, who is a humorist men tally as well as from a mimetic point of view, to gild the top of the monument erected to the others by remarking in an awe-stricken voice: "And would you believe it. he writes his own stuff, too!"

There are indeed but few men on the variety stage who are capable of writing their own stuff. In those dark ages be fore the French word "vaudeville" had been misapplied to that honored cradle of popular humor, the old rough-and-tumble oisterously funny variety stage, there was a tradition to the effect that Harry and John Kernell wrote their own stuff and never bought anything that had been written by others. Certainly their right and title to their jokes and witticisms was never questioned, and as they seldem ever added anything new to their repertoire except what they gleaned from the comic weeklies it is fair to presume that they never bought any. Lew Dockstader is an other example of a man who never buys anything from any person capable of writing an original piece of humor, and this fact may account for the offensive quality of a great many of Mr. Dockstader's jokes

There was one man, however, who was a legitimate product of the American variety stage, and who not only wrote his own stuff, as the saying is, and read his own lines with inimitable zest and teiling effect, to appreciate this man and howl a boister ous welcome to him when the time came and women who consider Chevaller "altogether too awfully clever for anything' might have discovered that all the "co iques" and clowns and comic "artists" that tic manner. The audience was entirely sat- have come here from England during the isfied, and there is little doubt that Mr. past ten years would not equal, if rolled Lancaster's "Wies Child" is capable of leav- into one big ball of dough, a single phase
